

Café Latte

Ingredients

1 dark roasted coffee pod,
fresh brewed dark roasted
or espresso coffee grounds

2 oz. whole milk

Directions

1. Add the coffee pod to the Single Serve Insert, select the "Iced" setting and the 8oz setting to brew a strong cup of coffee.
2. Warm up the milk in a microwave or in a small saucepan over medium-low heat until the milk begins to steam. Do not scorch the milk. This is "steaming" the milk.
3. Use a frother to create a frothy milk for the coffee.
4. Using a spoon to stop the frothy foam from entering the cup, carefully pour the foamy, steamed milk over the coffee. Spoon a couple tablespoons of the foam on top of the coffee.

TIP: You can add a tablespoon of your favorite coffee flavor (i.e... chocolate, caramel) for a flavored Latte or dust the top of the foam with cinnamon or another spice of your choosing.
